

## Methodology Description

The results presented here are from four national polling surveys More in Common conducted from June-September 2020 in partnership with YouGov. As part of our research process, we also engaged an online research community of approximately 100 diverse Americans over the course of April through August 2020.

**Survey 1 (Democracy and the Election).** We surveyed 8,000 Americans in July-August of 2020. The data was weighted to be representative of American citizens to a sampling frame built from the 2018 American Community Survey (ACS). The data was weighted using propensity scores, with score functions including gender, age, race, education, and region. The weights were then post-stratified on 2016 Presidential vote choice, and a four-way stratification of gender, age (6-category), race (5-category), and education (4-category). The margin of error (adjusted for weighting) is +/- 1.33.

This survey included asked questions on attitudes toward democracy as a system of government, local community and democratic culture, perceptions on the US political landscape including possible election scenarios, and political and media consumption behaviors.

**Survey 2 (National identity and Meta-Perceptions).** We surveyed 4,000 Americans in July of 2020. The data was weighted using propensity scores and post-stratification, with a sampling frame built from the 2018 American Community Survey (ACS). The propensity score function included gender, age, race, education, and region. The weights were then post-stratified on 2016 Presidential vote choice, and a four-way stratification of gender, age (4-category), race (4-category), and education (4-category). The weights were then trimmed at a maximum value of 7, and then re-centered to have a mean of 1. The margin of error (adjusted for weighting) is +/- 1.74.

This survey included questions that explored major phenomena related to American identity and pride, including American beliefs about the country's history, Americans' shared experiences, and ideas for the future.

**Message testing.** We surveyed 2,000 respondents (drawn from the Survey 1 sample) for message testing. The survey tested messages emphasizing various themes that emerged as points of cohesion in the 8,000-person survey. These themes included: resilience of America's electoral process, trust in local election officials, and duty to country, among others. Respondents indicated their agreement with the messages using a slider scale that ranged from 0-100.

1. Which statement do you agree with more?

Democracy and the Election		Gender			Age				Race			Region			
Importance of the 2020 election	US Avg.	Male	Female	Silent Generation	Baby Boomers	Gen X	Millennials	Gen Z	White	Black	Hispanic	Asian	Urban	Suburban	Rural

Very divided	58%	81%	76%	69%	47%	60%	46%	50%

## Message-testing results:

- Duty means doing the right thing even when it's hard. This year Americans have a duty to wait for every valid ballot to be counted even if it takes a while -- because a slower process is just as valid as a fast one. Every generation before us has done their duty to keep our democracy strong, it's up to us now.

- America's election workers are our neighbors and friends who work side by side to make sure every ballot is counted, fairly and properly. Our election systems are not perfect, but we can trust our local election workers to ensure the accuracy of this year's election.

3. No election system is perfect, but America’s elections are some of the very best in the world. Americans have been holding elections for almost two-hundred and fifty years. We have successfully voted during the Civil War, two World Wars, and other crises. Americans can be confident that we will overcome this year's challenges to hold a fair election.
