Navigating the Cost of Living Crisis in Europe

A Comparative Study by More in Common

2 September 2022
More in Common is an international initiative set up in 2017 to build societies that are stronger, more united, and more resilient to the increasing threats of polarisation and social division.

We work with a wide range of groups in civil society, politics, government, business, faith, education, philanthropy and the media to connect people across lines of division.

More in Common has teams in France, Germany, the United Kingdom, Poland and Spain as well as the United States.
## Cost of Living Survey

### Methodology: End of July 2022

| Fieldwork dates | **France**: 19-26 July, 2022  
**Germany**: 19-25 July, 2022  
**Poland**: 18-21 July, 2022  
**UK**: 19-21 July, 2022 |
| Fieldwork Method | Online survey using quotas and weights to achieve demographic and political representation of adult populations |
| Key Details | Surveys are a mix of common and tailored, nationally specific questions. In some cases, numbers do not add up to 100% due to rounding. |
Table of Contents

1. Impacts on people's lives and expectations for the future
2. A further erosion of trust
3. Policies to prepare for winter
4. Communicating about the crisis
Key findings

- **People everywhere are feeling the sting of rising prices.** The crisis is personally impacting everyone across the UK, France, Germany and Poland where it is the top issue on people’s minds. Many are already struggling to cope; having to draw from savings or skip meals, particularly among disengaged and low-trust segments of the population. The vast majority believe this won't be a short crisis, with many seeing no end in sight. **Russia** is seen as mostly to blame for the crisis, but energy companies and national government are also seen as responsible. Support for the war in **Ukraine** remains fairly high, although nearly one in three Poles and Germans think their government is doing too much for Ukraine.

- **Trust in government’s abilities to handle the crisis is low.** A perception that governments are not on top of the crisis has set in and will likely only get worse with winter approaching. How governments handle the crisis in the coming weeks may have lasting effects not just on their popularity but on trust in the system as a whole. Most people don’t trust any political party to deal with the crisis but opposition parties are making gains everywhere, including populists and authoritarian parties such as the National Rally in France, which is seen as most trustworthy.
Key findings

• **Unprecedented inflation could threaten social cohesion in Europe.** Coming on the heels of COVID-19, people in all countries are worried about potential social upheaval, fearing protests, strikes and people going hungry over the winter as price increases bite even further. Yellow Vest-type movements may be poised to return.

• **The crisis has not diminished people’s resolve on climate goals, far from it.** Policies in favour of renewables – now seen as a way to save money and achieve energy independence receive clear support from the public, although that may be short lived especially among many low-trust groups who prefer climate commitments be put on hold.

• **Policies to deal with the crisis must bridge the short and the long term.** People are prepared to make sacrifices and pay high prices but they need to see both clear short-term relief and society-wide change to lock in long-term support. Many need immediate relief before they can look ahead. Policies that garner the most support combine short term solutions (tax cuts, price caps, taxing windfall profits and providing free alternatives to driving) as well as clear plans for long term investments.
Please skip ahead to slide 12 if you are familiar with the segmentation.

More in Common’s Segmentation
About the segmentation used in this survey

- In France, Germany and the UK, More in Common has developed nationally relevant values-based segments.

- These are created entirely from questions around five areas of core beliefs, drawn from social psychology: group identity and tribalism, perceived threat, parenting style and authoritarianism, moral foundations, personal agency and responsibility.

- No demographic information (race, class, or gender) is used for the segmentation, though the segments created through this process often have demographic differences.

- Segmentation shows that values and beliefs are powerful in influencing how individuals form opinions about issues and their behaviour. Often, the segments are more predictive of beliefs than any other metric.
Across countries, we see similar types of groups:

• **Politically-oriented segments** tend to have the strongest opinions and dominate the public conversation. They can sometimes be polarising forces in societies as they have firmly-held ideological stances which they like to actively advance.

• **Stabilising segments** are generally satisfied with the system and most likely to have an optimistic view on society. They sometimes live in a comfortable bubble.

• **Disengaged segments** are the least integrated groups. They tend to be the most precarious, which might be a reason they find less time to interact with their local communities, let alone politics or civic life.

• **Low-trust segments** cut across the left-right spectrum as well as the engaged-disengaged. They tend to have a high sense of victimhood and heightened threat perception. **Understanding their priorities and concerns is key to gaining support for the important policy changes needed to tackle shared challenges and the biggest issues of our times.** These groups can be decisive in elections.
More in Common’s segmentation in France

Disillusioned Activists are ideologically-driven and sensitive to issues of social justice. They feel alienated in this fight and are unhappy with the way things are going in France.

Identitarians feel their way of life is being threatened. Above all, they value law and order.

Stabilizers believe in compromise and solidarity. They are more moderate in their views and are active in their local communities.

Optimistic Pragmatists are confident things are going in the right direction. They are idealistic but believe the system works.

The Disengaged see a lot wrong with the world but have too much going on to take the fight up themselves. They are detached from others in society, as well as politics.

The Left Behind feel angry at the system and are resentful of others. They think everyone is doing better than them.
More in Common’s segmentation in Germany

**The Open** value self-expression, open-mindedness and critical thinking

**The Involved** are civic-minded and active democrats, value togetherness, and are willing to defend progressive social achievements

**The Established** value reliability and social harmony and are most likely to feel satisfied with the status quo

**The Detached** value success and personal advancement, are less likely to think in abstract societal terms or to be interested in politics

**The Disillusioned** have lost a sense of community and long for recognition and social justice

**The Angry** value order and control in national life, are angry at the system, and have very low levels of trust
More in Common’s segmentation in the UK

**Progressive Activists**
- ...a group for whom politics is an important part of their identity and who seek to correct longstanding injustices
- Politically-oriented

**Civic Pragmatists**
- ...a group that cares about others, at home or abroad. They wish for less conflict and more compromise
- Stabilising

**Disengaged Battlers**
- ...a group that are just getting by. They blame the system for its unfairness, but not other people
- Low-trust group

**Established Liberals**
- ...a group that has done well and means well towards others, but also sees a lot of good in the status quo
- Stabilising

**Loyal Nationals**
- ...a patriotic group, who worry that our way of life is threatened and also feel our society has become more unfair
- Low-trust group

**Disengaged Traditionalists**
- ...a group that values a well-ordered society and prides in hard work. They want strong leadership that keeps people in line
- Low-trust group

**Backbone Conservatives**
- ...a group who are proud of their country, optimistic about Britain’s future outside of Europe, and who keenly follow the news
- Politically-oriented
Impact on people’s lives and expectations for the future

No end in sight: few expect a short crisis. More than 1 in 3 are unsure it will ever end.

When do you expect the cost of living crisis to end?

- Later this year (%)
- Sometime next year (%)
- In the next few years (%)
- I’m not sure if it will ever end (%)

![Bar chart showing responses to the question of when the cost of living crisis is expected to end.](chart.png)
People don't feel others are faring better than they are, for now

- At least 97% in all countries say they are feeling the effects of rising prices.
- For now, no segment feels they are doing worse than others in the crisis but that is unlikely to last into winter.

Which of the following best describes how you feel about rising prices?

- I am feeling the effects of rising prices, but I think most people in the country are worse off than I am (%)
- I am feeling the effects of rising prices and I think most people the country are feeling it to about the same extent as I am (%)
- I am feeling the effects of rising prices and I think most people the country are doing better than I am (%)
- I am not feeling the effects of rising prices (%)
People are cutting down on expenses where they can
1 in 5 are drawing down from savings, 1 in ten are skipping meals.

Which of the following actions have you taken in recent months to deal with the rising cost of living, if any? Select all that apply.

- I’m shopping around more for my groceries to find better deals
- I’m cutting down on luxuries and non-essentials
- I’m going out less
- I’m drawing less to save money on fuel
- I’ve cancelled or changed holiday plans this year
- I’ve cut down my electricity / heating usage
- I’m drawing down from my savings
- I’m investing in energy saving devices such as LED lightbulbs
- I’m working more (e.g. taking on a second job)
- I’m giving less money to charity
- I’m postponing costly medical care
- I’m skipping meals

In the UK and elsewhere, people expect a new winter of discontent

For each of the following, please indicate if it is something you expect or do not expect to happen this winter as a result of rising bills?

As a result of rising bills, I expect... (%)

- More strikes: 85%
- More protests: 84%
- More mental health issues: 83%
- People go hungry: 81%
- Shoplifting becomes more common: 80%
- More people become homeless: 77%
- People die because of the cold: 74%
- Many people refuse to pay their energy bills: 71%
- More children falling behind at school: 61%
- Riots take place across the UK: 52%
In France, 4 in 10 want to see a return of the Yellow Vests

To what extent would you support a return of the Yellow Vests movement?

- Disillusioned Activists: 40%
- Identitarians: 61%
- Stabilizers: 53%
- Optimistic Pragmatists: 51%
- Disengaged: 24%
- Left Behind: 12%
A further erosion of trust
The crisis is a potential boon for opposition parties, including populists and authoritarians like Marine Le Pen

- The cost-of-living crisis exacerbates the deep crisis of trust left by the handling of the COVID pandemic.

- People don't trust any party to deal with rising prices, but opposition parties are poised to make gains from the crisis.

- In France, people trust the National Rally the most to deal with the crisis.

- In the UK, trust in Labour is 20 points higher than in the Conservatives.

- In Poland, the crisis threatens PiS’ support in the run up to next year’s elections.

Which of the following do you trust most to tackle the rising cost of living?

- None of these: 33
- National Rally: 15
- Don't know: 13
- None of these: 33
- CDU/ CSU: 18
- Don't know: 12
- Don't know: 26
- None of these: 20
- Law and Justice: 16
- Labour Party: 60
- Conservative Party: 40
People's understanding of the reasons for the crisis is strikingly low in France

Do you understand why cost of living is rising?

I understand well (%)

- Poland: 70%
- United Kingdom: 65%
- Germany: 60%
- France: 32%

Showing sum of very + fairly well

Broad majorities see a faster transition to renewables as an answer to the cost of living crisis

Support for accelerating the transition to renewables includes...

- In France, 80% of Stabilizers, 73% of Left Behind, and 67% of Identitarians

- In Germany, 83% of the Angry and 82% of the Disillusioned

- In the UK, 80% of Loyal Nationals, 78% of Disengaged Battlers, and 76% of Backbone Conservatives

To what extent would you support, or oppose, the following measures to help address the rising cost of living?
Majorities see renewables as a chance to achieve energy independence

We should accelerate the transition to green energy to meet our climate commitments and achieve energy independence faster.

Pushing our climate commitments back only keeps us dependent on people like Putin.

Governments around the world are setting targets to reach net zero goals and tackle climate change. To what extent do you agree with the following statements? (Agreement scale 0-10)
Showing sum of 6-10.
Investing in renewables is seen as the best way - by far - to achieve energy independence from Russia

Which of the following options do you think is the best way of eliminating our dependence on Russian oil and gas?

- Expanding our use of renewable energy
- Expanding our country’s nuclear energy production
- Importing oil and gas from other countries
- Burning coal made in our country
- Expanding our country’s domestic supply of oil and gas through drilling and fracking

*Not shown: “Don’t know” and “Other” responses*
Too little too late: People blame the government’s sluggishness on renewables as one of the reasons prices are currently rising

The government has been too slow to invest in renewable energy. That is one of the reasons for the recent increase in energy prices.

Governments around the world are setting targets to reach net zero goals and tackle climate change. To what extent do you agree with the following statements? (Agreement scale 0-10) Showing sum of 6-10.
Renewable energy sources are considered more reliable than non-renewable energy sources

How reliable, if at all, are the following energy sources?

Showing sum of very reliable + somewhat reliable.
People are starting to believe renewables are cheaper than other forms of energy, although many remain unsure

Do you think each of the following types of energy are more expensive or cheaper than oil and gas, or is it about the same?

<table>
<thead>

Communicating about the crisis (message testing)
Governments around the world are setting targets to reach net zero goals and tackle climate change. To what extent do you agree with the following statements? (Agreement scale 0-10); Showing sum of 6-10. *UK data from April 2022 where some terminology varies.

- If we push back deadlines on climate, big businesses won't do anything and will just avoid the problem*
  - [%] 67 61 58 62

- We should accelerate the transition to green energy to meet our climate commitments and achieve energy independence faster
  - [%] 66 60 61 66

- The government has been too slow to invest in renewable energy. That is one of the reasons for the recent increase in energy prices
  - [%] 62 64 64 66

- Delaying our climate commitments will only push our energy bills up in the medium and long-term
  - [%] 60 52 57 59

- Pushing our climate commitments back only keeps us dependent on people like Vladimir Putin
  - [%] 60 56 58 64

- I think climate activists have too much power and are dictating what we should do, to the detriment of ordinary people
  - [%] 47 49 46 42

- Pushing up the price of oil and gas is part of a government plan to force us to switch to renewable energy
  - [%] 46 43 43 36

- Our country’s actions on climate won’t make much of a difference to the planet, so we should focus on more pressing issues like the cost of living*
  - [%] 42 42 44 39

- We need to push back our climate commitments to give people time to recover from the rising cost of living*
  - [%] 40 47 50 52
But support could weaken by winter...

- Arguments to prioritise the cost of living over climate change are less persuasive
- Citizens do believe their countries can have impact on climate change – there is no incentive to wait on others to push ahead with climate action
- But for about half the population, the immediate crisis takes precedence over climate commitments

Governments around the world are setting targets to reach net zero goals and tackle climate change. To what extent do you agree with the following statements? (Agreement scale 0-10)

Showing sum of 6-10. *UK data from April 2022.
Particularly among low-trust groups, who are often suffering the most from rising prices

Our country’s actions on climate won’t make much of a difference to the planet, so we should focus on more pressing issues like the cost of living*

Governments around the world are setting targets to reach net zero goals and tackle climate change. To what extent do you agree with the following statements? (Agreement scale 0-10)

Showing sum of 6-10. *UK data from April 2022.
As the crisis deepens, a lack of trust and a conspiracy mindset may drive these segments to reject solutions.

Pushing up the price of oil and gas is part of a government plan to force us to switch to renewable energy.

Governments around the world are setting targets to reach net zero goals and tackle climate change. To what extent do you agree with the following statements? (Agreement scale 0-10) Showing sum of 6-10.
Majorities are prepared to make short-term sacrifices if they understand the long-term benefits

To what extent would you be willing, if at all, to accept a further rise in energy prices for the next year if it meant...

*Not asked in the UK
Action on renewables should come with short-term relief to avoid a contest of priorities

To what extent would you support, or oppose, the following measures to help address the rising cost of living?
Public strongly backs windfall profit taxes and cash incentives for EVs and heat pumps

To what extent would you support, or oppose, the following measures to help address the rising cost of living?

A cash incentive or interest free loan to invest in energy saving devices such as electric cars, heat pumps or home insulation

Increase taxes on profits made by energy companies

Appendix: Previous Survey Waves

The Cost of Living study is part of More in Common’s *Navigating Uncertainty* project (2021-2022). Where relevant, we reference tracking data from two previous waves of survey work. Full details are available on our website.

### Wave 1
- **Fieldwork Dates**: 7-15 December 2021
- **N-size**: 2,000
- **Research Partner**: YouGov
- **Margin of Error**: 2%
